

Invest in **100% green**, socially responsible and local energy

The **TM EnerCoop S.C. cooperative** is a player in the energy transition.

It was developed as part of the Transition Minett citizens' initiative. Since 2013, the year it was founded, TM EnerCoop S.C. has installed a large number of photovoltaic systems on municipal buildings in 6 municipalities in the south of the country. TM EnerCoop S.C. is seeking to expand the local production of renewable energy financed by citizens to contribute to the energy transition.

## Our Values and objectives

- ✓ PRODUCING green energy **LOCALLY**
- ✓ Contributing to **ENERGY INDEPENDENCE** and promoting the **LOCAL/REGIONAL ECONOMY**
  - ➔ Our production covers the average consumption of our members.
- ✓ Combating the climate crisis and making a positive contribution to the **ENERGY TRANSITION**
- ✓ **INVESTING IN THE FUTURE** while earning a return on investment in proportion to results
  - ➔ Sustainable and transparent investment
- ✓ Being fully involved thanks to **DECISION-MAKING POWER**
  - ➔ **1 MEMBER = 1 VOTE** (regardless of the number of shares held)

Being part of a cooperative reflects these values and is based on the belief that acting collectively is more efficient than acting individually.

It also makes it possible to combine social and economic objectives.

Finally, the cooperative is a place to learn about economic democracy.

## The energy transition

Energy is an essential part of our everyday lives. The way it is produced determines the society we are preparing for tomorrow.

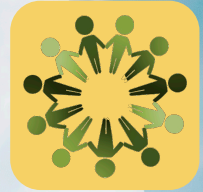

TM EnerCoop S.C. offers a **socially and environmentally responsible alternative to energy production**. It promotes an energy transition based on **the involvement of every citizen**.

## The energy cooperative

**Democratic at grassroots level, it is run by its members, who play an active role in project development and decision-making.**

Decisions are taken at the Annual General Meeting in a democratic and transparent way, based on the "one member, one vote" rule. The cooperative is managed by a Board of Directors.

**The articles of association can be consulted on the website: [www.tmenercoop.lu](http://www.tmenercoop.lu)**

## Members

Who can take part?

**Any individual, non-profit organisation or foundation** that wants to invest in a sustainable, socially responsible project.

How do I get involved?

Please complete the **declaration of interest** ([www.tmenercoop.devenir-cooperateur](http://www.tmenercoop.devenir-cooperateur)). You can subscribe to shares at a price of 100 € per share.

Who has the power to decide?

Each member has a **single vote in the General Meeting**, regardless of the number of shares subscribed.

For how long do I have to commit?

You can sign up for as long as you want: TM EnerCoop S.C. is a company with variable capital, which you can ask to leave at the end of each financial year.
